WELCOME

The EFCE-Spain group (ANQUE, AIQS, AEIC and SEQUI), the congress partner (Expoquimia), congress sponsors, exhibitors and supporters have the pleasure of welcoming you to the 10th World Congress of Chemical Engineering held in conjunction with the 11th European Congress of Chemical Engineering, the 4thEuropean Congress of Applied Biotechnology and its Joint Events.

The World Chemical Engineering Council (WCEC), the European Federation of Chemical Engineering (EFCE) and the European Society of Biochemical Engineering Sciences (ESBES) promote this "three in one" congress. This group of events will be a unique opportunity for you to meet with researchers and specialists in practically all areas of chemical engineering and to improve your strategy for the development of innovative processes that will be vital for the society of tomorrow.

The Congress will take place in an ideal context in place and time. Fira de Barcelona's activity, venues, experience and leadership make it one of the most important trade fair institutions in Europe. Fira holds state-of-the-art meeting rooms, exhibition areas and catering facilities, with a functional layout that we are sure you will enjoy during your stay.

Barcelona is the perfect setting for the congress thanks to its privileged position in the Mediterranean shore, gateway and home of several ancient cultures has always represented the essence of art, culture and progress in Spain. Barcelona is the flagship city of the wealthiest region of Spain, leader in art, design, industry and lifestyle, a must visit for travellers and an endless source of inspiration.

An increasing world population, in a world of finite natural resources, requires ever more innovative Chemical Engineering to solve societal future challenges. If a commercial new or better product must be obtained, if an industrial process must be implanted, if an existing process must be improved, if the environmental impact must be reduced, etc., Chemical Engineering methodology is applicable. The S&T program will bring innovative solutions to respond to major societal challenges. Plenary, Keynote, Invited and Contributed lectures will bring you up to date in all topical areas of modern Chemical and Biochemical Engineering to address Solutions 4 Global Challenges. There will be large poster sessions, workshops, especially for younger people and plenty of time for networking opportunities.

We are honoured by the exceptional response to the WCCE10 and the quality and number of contributions. You have made this event possible. We thank you for that and very specially recognize the incredible work that committees and voluntaries have done to organize the largest world congress to date. We will do our best to make your stay a success, useful, enjoyable and unforgettable.

Welcome to WCE10 and Barcelona!
